

**INDEPENDENT 3RD PARTY LAB TEST RESULTS**

## PRODUCT OVERVIEW

CBD has exploded in popularity as a health supplement, and for good reason: Scientific research shows CBD has the potential to help with many conditions and ailments, including anxiety, chronic pain, insomnia, Parkinson's disease and even seizure disorders and schizophrenia.

Because of CBD's evolving legal status, CBD products are largely unregulated, and it's an unfortunate reality that substandard or inaccurately labeled products are on the market. It's crucial that consumers make sure the CBD they purchase has been 3rd party independently lab tested for purity and potency – including the products we sell here at 7 Point Naturals. By learning more about CBD testing and the types of extracts that are available, you can avoid snake oil products and make sure you're getting what you're paying for – along with all the potential health benefits that come with it.

Here at 7 Point Naturals, we take pride in using the purest CBD available in our entire product line. Unlike the vast majority of CBD companies, we purchase ALL of our material from GenCanna – the most compliant, transparent, genetically superior hemp farm in the United States. GenCanna's CBD is literally traceable from the seed to the store. This alone verifies our products are consistent and the highest quality possible.

Additionally, we manufacture all of our products in our ISO7 clean room lab located in Delray Beach Florida. Each and every product we sell has a scan able QR code that will link you to the independent 3rd party lab results for that particular batch – guaranteeing our customers they are purchasing the highest quality CBD products available.

Our latest lab results are shown below – so you can buy with confidence.
